WEDNESDAY · 16 SEPTEMBER 2026

WORKSHOP
09:00-10:00 DFG 3D-Viewer Practical Guidelines on metadata for 3D cultural heritage
TBA

WORKSHOP
10:00-10:30 **Virtually There: Building Sustainable Digital Heritage and Developing Virtual Worlds with IIIF 3D**
Ronald S. Haynes, University of Cambridge, United Kingdom

With the growing importance of IIIF for the world's most shareable and sustainable digital collections, 3D data is a key addition to the ability to preserve our past and present a future with greater depths and dimensions of suitable narratives and factual fidelity. The great developments and applications of 3D media are explored in the 3D Community Group (CG) and 3D Technical Specification Group (TSG), and some key examples will be shared in the workshop.

The newly launched IIIF Presentation API 4.0 includes the standards for interoperable 3D content, expanding the potential for all IIIF-based collections. In this session we show you how to try some of the new capabilities, to engage with and help further the refinement of examples from multiple 3D collections.

The Presentation API 4.0 also has options for incorporation of 2D and A/V with 3D data, including for digital dioramas, scene construction considerations, and for more inclusive and sustainable virtual worlds. This session will provide an overview with use cases, some available demos and take-home examples, and guidelines on the accessible use of AI and other tools for combining and creating files, based on the technical specifications for IIIF 3D, to demonstrate the vast possibilities of using Presentation API 4.0. Please join us!
